

County Maps of the English Learner (EL) Population

The following maps depict the EL population by county - changes in their numbers from SY 2000-01 to SY 2011-12, and the total number and percentage of all students identified as ELs in SY 2011-12. The maps were created using county data from the National Center for Education Statistics' Common Core of Data.

(Note: Data are not available for all counties for each map provided.)
